Our Mission

We create customized executive AI education programs grounded in cutting-edge academic research and real-world deployments across 420+ AI systems. Programs are data-driven, practice-based, and tailored to the regulatory, strategic, and operational needs of government and enterprise organizations in the Kingdom of Saudi Arabia.

\$1.8B Enterprise Value Delivered · 420+ AI Systems · Zero Regulatory Findings across Fed, OCC & NCUA

♦ Saudi Arabia & Vision 2030

Our programs align directly with SDAIA mandates, the National AI Strategy, and KSA's ambition to lead global AI by 2030. Available in Arabic. Customized for government agency contexts.

Saudi Arabia Has Committed \$40B to AI.

The Leaders Who Act Now Will Define the Decade.

\$40B

Saudi AI Investment Committed

SDAIA is executing the National AI Strategy at pace. Government agencies have mandatory AI readiness targets by 2026.

74%

of AI Initiatives Fail to Scale

Without leadership capability and governance architecture, investment does not translate to outcomes. — BCG

5+

Giga-Projects Demanding AI Leadership

NEOM, Red Sea, Qiddiya, ROSHN, Diriyah. Each requires AI-literate executives and sovereign governance capacity.

2030

The Window Is Fixed. The Clock Is Running.

Organizations that build AI leadership capability now will lead. Those that wait will procure from those who did.

AI Education for Every Leadership Level

STRATEGY

AI Strategy & Innovation

- AI Impact Assessment & Readiness
- AI Strategy Development
- Agentic AI Transformation Roadmap
- Data Strategy & Governance Framework

In-Person · Remote · 1–3 Day Workshop

GOVERNANCE

October 9–11 · Miami, FL

December 4–6 · Chicago, IL

FORMAT

Weekend intensive (Fri–Sun) · Live online · Private cohort · Arabic on request

INVESTMENT

From \$3,500 per person

From \$35,000 private cohort

CERTIFICATION

CAIO Executive Credential · ISO 42001 module included

WHO SHOULD ATTEND?

C-suite & aspiring CAIOs · Risk & compliance leaders · Government agency heads · Regulated industry executives

ISO 42001 AI Management Systems

Lead Auditor Certification & Enterprise Implementation

The only globally recognized standard for AI management. The only trainer who has lived it across five Fortune 500 institutions — with zero regulatory findings.

WHO SHOULD ATTEND?

- Chief AI Officers and Chief Data Officers
- AI governance and compliance leaders
- Risk, audit, and legal officers responsible for AI oversight
- Internal auditors expanding into AI systems
- Government agency compliance teams

WHAT YOU WILL LEARN

- ✦ Full ISO 42001 framework — structure, requirements, implementation
- ✦ ISO 42001 conformity assessment and gap analysis
- ✦ Designing and documenting an AI Management System (AIMS)
- ✦ Integrating ISO 42001 with ISO 27001 for unified governance
- ✦ Preparing for third-party certification audit
- ✦ Applying the standard to Generative AI and Agentic AI deployments
- ✦ Alignment with SDAIA, SAMA, OCC, and global AI regulatory frameworks

WHY THIS MATTERS NOW

- ✦ 84% of companies face regulatory pressure on AI — Gartner
- ✦ ISO 42001 is the baseline requirement in regulated industries
- ✦ SDAIA driving ISO alignment across all KSA government agencies
- ✦ US Fortune 500 boards now demanding certified AI governance

FACULTY

Dual-certified ISO 42001 & ISO 27001 Lead Auditors with active enterprise deployment experience across BofA, Morgan Stanley, Barclays, Citigroup, and HVCU.

FORMAT

3-day intensive · In-person or live online · Arabic available

INVESTMENT

From \$3,500 per person · From \$30,000 private cohort

CERTIFICATION

ISO 42001 Lead Auditor Preparation Certificate · Exam guidance included

AI Governance & Agentic AI Leadership

From policy frameworks to autonomous agents — govern what you deploy.

AI agents are making decisions and executing tasks without human approval. Most organizations have no governance architecture for this. We build it with you.

WHO SHOULD ATTEND?

- Executives overseeing AI deployment in regulated environments
- Risk, compliance, and audit leaders
- Technology leaders deploying or evaluating agentic AI
- Board members with AI oversight accountability

AI GOVERNANCE MODULE

- ✦ Building enterprise AI governance frameworks from scratch
- ✦ RACI models for AI accountability — who owns what
- ✦ Regulatory alignment — SDAIA, SAMA, OCC, Fed, EU AI Act
- ✦ Board reporting on AI risk — what directors need to know
- ✦ ISO 42001 governance integration

AGENTIC AI MODULE

- ✦ What is Agentic AI — architectures, capabilities, and risks
- ✦ Multi-agent systems — orchestration, tool use, and autonomy levels
- ✦ Human-in-the-loop design — when to intervene and how
- ✦ Monitoring frameworks for autonomous AI systems
- ✦ Deploying Agentic AI safely in regulated industries

FORMAT

2-day executive workshop · In-person or live online · Arabic available

INVESTMENT

From \$2,500 per person · From \$20,000 private cohort

FACULTY

MIT · Kellogg · Johns Hopkins · Columbia · US Air Force

CERTIFICATION

AI Governance & Agentic AI Certificate of Completion

Hands-On AI Workshops

Available as private corporate engagements or open enrollment · In-person · Online · Hybrid
